## ABOUT ME

I am a data-driven and hard-working analyst combining a scientific foundation from Oxford with professional experience in sports and business data analytics. I enjoy finding the story that data tries to tell us. My skills lie in uncovering trends from large datasets, building predictive models, and communicating findings to others. I am passionate about sport, problem-solving, testing myself with new challenges and applying data to improve business strategy. Providing an effective and successful service to clients is of utmost importance to me.

## WORK EXPERIENCE

**Senior Analyst at Sportradar (Premium Cricket) (August 2022-present):**

- Promoted after 18 months to Senior Trading Analyst (April 2024-present): hands-on modelling responsibilities. Data analysis and reporting to drive team strategy. Leading team training sessions for newer starters.
- Trading Analyst (August 2022-April 2024): cricket player and team data collection and analysis for trading purposes and to improve models.

**Athena Tuition (December 2020-December 2022):** Oxford Earth Sciences interview preparation.

**St. Peter's College Bar Supervisor (September 2019 – November 2021):** responsibilities managing people and stock.

**Estée Lauder Companies: Consumer Experience Advisor (November-December 2017)**

## EDUCATION

**Earth Sciences at St Peter's College, Oxford (October 2018-June 2022):**

- First Class Honours, MEarthSci course.
- Awarded a Barron Scholarship on merit for 2nd year performance.

**King Edward's VI Southampton (2012-2017):**

**A Levels:** A* (French), A (Maths), A (Chemistry)

**AS Level:** A (Geography)

**GCSE:** 11 A*s

## SKILLS

**Programs:** SQL, PowerBI, highly proficient in the MS Office suite, especially Excel. Currently doing a course to learn Tableau, Python, Machine Learning, Generative AI and GitHub.

**Data Analysis & Reporting:** Built a logistic regression model using historical data to predict the number of 50s in cricket matches. Regularly prepare data-driven reports on performance and provide strategy recommendations based on findings within these. Displayed the findings from my Masters Project in my thesis via a series of graphs and diagrams, culminating in a First Class degree. Earth Sciences course gave me critical reasoning an flexibility in how to approach different problems.

**Statistics & Data Processing**: Used Excel to prepare, clean and carry out analysis of cricket and betting data to improve our models. Knowledge of Poisson distributions, Chi-Squared testing, Linear and Logistic Regression. 80% in University Statistics course. Data cleaning and processing during Masters Research Project.

**Communication**: Concise communication skills developed via regular data/trend reporting and daily client communication at Sportradar. At Estée Lauder, I was one of the most productive members of my team in answering queries, and I routinely resolved difficult situations with unhappy customers.

**Languages:** Working-level French: 98% in A level, and regular interaction with the language. Currently learning Italian.

**Leadership:** Developed new training programmes at Sportradar and hold one-to-one sessions with new starters.

**Teamwork**: Collaboration, and both giving help to and seeking help from others are huge parts of my personality. I have refined this skillset at PCS through training others, and discussing modelling issues with my team-mates.

## INTERESTS/EXTRACURRICULAR

**Sport**:

- Played for Oxford University Cricket Club, Burridge CC 1st team, was captain of school cricket 1st team.
- Captained college football 2nd team; played college cricket, rugby, pool and squash.

**Voluntary work:**

- Coronavirus Tutoring Initiative (March-December 2020): tutored 2 A level students in Maths and Chemistry.
- University Open Days: answered questions about uni life from prospective students.
